

# 60 NORTH GOLD

## MON GOLD PROJECT NEAR YELLOWKNIFE, NWT, CANADA

**ADVANCED GOLD EXPLORATION PROJECT WITH  
PRODUCTION HISTORY AND MINING/MILLING PERMITS**

### CORPORATE HIGHLIGHTS

The Mon Gold Project is a former underground producer that ran 1989 - 1997

Located in the Yellowknife Gold Belt, NWT, Canada. Past production in this Belt exceeds 15 million ounces of gold at grades >0.5 oz/tonne, including the Con, Giant and Discovery Mines

The mineralization identified in the former-producing A-Zone appears to be a viable exploration target for a "Discovery Mine" type of deposit. The Discovery Mine (located 50 km to the north) mined 1 million tons of ore and recovered 1 million ounces of gold between 1949 and 1969. In addition, several "Giant Shear Zone" targets have been discovered on the property.

Mechanized trenching at the crown pillar in the A-Zone produced samples ranging from 1.2 gpt gold over 0.9 m to 688 gpt gold over 0.5 m

Metallurgical testing of a quarter tonne sample from the A-Zone crown pillar yielded recoveries averaging 98.8% at a grade of 158.0 gpt gold with simple gravity and flotation circuit

Land Use Permit and Water License for mining and milling production at 100 tpd are in place; the Mon Gold Project is the only gold project in the NWT permitted for production

Multiple exploration targets defined in 2017 and 2018 prospecting program outside the A-Zone: two parallel gold trends over 3 km long and a 2.5 km long horizon hosting VMS

Sixty North Gold Mining Ltd. has an option to earn an 80% interest in the Mon Gold Project, subject to a 20% carried interest and a 2% net smelter returns royalty by spending \$6m on the project to the end of 2020

Experienced mine operating, geology and public company team in place

## MANAGEMENT & BOARD

**John Campbell, B.Comm, CA, CPA, MBA, CFA**  
Chairman of the Board & CFO

**Ronald L. Handford,**  
**P.Eng.(Non-Practising) B.A.Sc., MBA,**  
CEO and Director

**Grant Block,**  
**CPA, CA, CMA, CPA (Nevada),**  
Director

**Andriyko Herchak,**  
**B.Comm., CPA, CA,**  
Director

**Ian M. Klassen, B.A. (Hons)**  
Director

**Brian Malahoff, P.Geo.**  
Director

## PROPERTY OWNER/ PROJECT MANAGER

**New Discovery Mines Ltd.**

**Dr. Dave R. Webb,**  
**B.A.Sc., M.Sc., Ph.D., P.Geo., P.Eng.,**  
Director

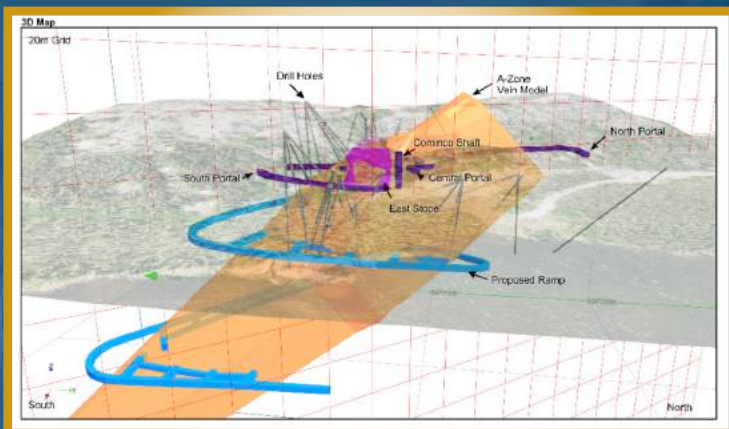

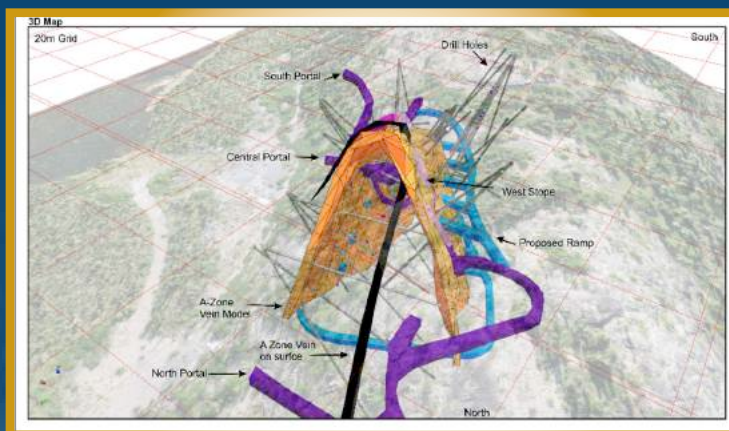

**Gerry V. Hess,**  
President

## PROPOSED UNDERGROUND BULK SAMPLING

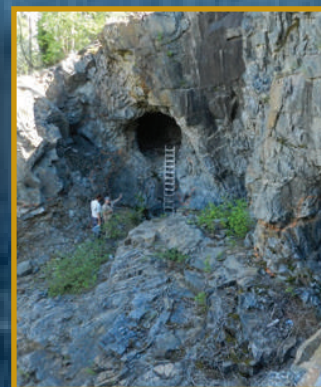

## PLANNED ACTIVITY 2019 AND BEYOND

Airborne geophysics program across the entire property to define drill targets

Continued surface exploration and initiating drilling program on several gold and VMS targets

A-Zone: deliver mining equipment and bulk consumables to site via winter road for underground sampling and bulk sample extraction and testing program

Future A-Zone program: underground drilling as warranted; install mill and dry stack tailings facility; process bulk sample and continue mining at an initial rate of 100 tpd.

Dr. David Webb, P.Geo., P.Eng., Q.P. as defined in NI 43-101 has reviewed and approved the technical information relating to the Mon Property contained in this Fact Sheet.
